Meeting Minutes Transmittal

**310/340 Project Meeting
Ecology Interface Meeting
2704HV/Rm. G229/600 Area
Hanford, Washington
November 30, 2000**

The undersigned indicate by their signatures that these meeting minutes reflect the actual occurrences of the above dated Project/Ecology Interface Meeting.

Fred Jamison, Project Manager, Ecology

Date: 12/28/2000

Gregory Sinton, Project Manager Representative, RL

Date: 12/28/2000

~~Cynthia K. Girres, Project Manager Representative, FH WMP~~ 1/8/01
DONALD J. McBRIDE, Director, 310 TEF/340 Facility Project, FH RCP

**STATE OF WASHINGTON, DEPARTMENT OF ECOLOGY
TOUR OF THE 310 TREATED EFFLUENT DISPOSAL FACILITY
AND 340 WASTE HANDLING FACILITY**

SUMMARY

DATE: November 28, 2000

FACILITY: 340 Complex and 310 TEDF (including 307 Basins)

REGULATORY AGENCY: State of Washington, Department of Ecology

AGENCY REPRESENTATIVE: Fred Jamison, Ecology Project Manager

FLUOR HANFORD-300 AREA LIQUID EFFLUENTS REPRESENTATIVES:

Don McBride, Director

Chris Strand, Environmental Compliance Officer

PURPOSE:

The tour of the 300 Area Liquid Effluent Facilities (300 LEF) was scheduled at the request of the State of Washington, Department of Ecology (Ecology) during the last monthly Project Manager Meeting held on October 26, 2000. The new Ecology Project Manager, Mr. Fred Jamison, requested a tour of the 310 Treated Effluent Disposal Facility (TEDF) and the 340 Facility to aid his understanding of the 300 LEF project.

MEETING SUMMARY:

The tour began at 8:00 am with an introductory meeting held at the 310 TEDF, MO-443. Following introductions, Mr. Don McBride, 300 LEF Project Director, provided a brief overview of the 300 LEF facilities. Mr. Chris Strand, 300 LEF Environmental Compliance Officer, provided an agenda and indicated the tour would be composed of two parts; a tour of the 340 Complex and 307 Basins, and follow-up with the 310 TEDF.

Mr. Fred Jamison was shown the 340 Building (including the Truck Lock, Decon Room, and Control Room), the 340B Building (including B East and West), the 340-A Building, the 340 Vault Tank and Stack area, and the 307 Basins. It was explained to Mr. Jamison that the 307 Basins are ancillary to the process wastewater system that feeds the 310 TEDF.

Mr. Jamison viewed and was briefed on the current operations at the 340 Facility, which include the following:

- Continuing activities supporting the management of waste generated from Process Sewer cleanout activities conducted this past September. These activities included the packaging and shipping of non-regulated sludge to the Arlington landfill, final cleanout of the Process Sewer Cleanout portable tank, and filtration and cleanout of 307 Basin #4.
- Scheduled shipment of a full low-level waste box from 340B West.
- Plans to perform an entry into the 340 Vault in support of advanced radiological characterization.
- Plans to perform a video camera surveillance of the 340-A Tanks.
- Plans to repackage 3 containers of low-level waste located in the 340 Decon Room.
- Recent receipt of a K Basins Multi-Canister Overpack for temporary storage in 340B East.

The tour returned to the 310 TEDF where Mr. Jamison was shown the control room and primary wastewater treatment components on the process floor. Mr. Jamison also observed waste minimization activities that involved operation of the oil/water separator. The visit concluded with the parties agreeing that the information provided during the tour would be sufficient and that the 310/340 portion of the monthly Waste Management Program Project Manager Meeting (PMM) would be cancelled. A summary of the tour is to be placed in the November 30, 2000, PMM minutes.

ACTION SUMMARY:

1. Mr. Strand will generate a tour summary. Action Complete.
